# LIVESTOCK SCALE KIT CATTLE HOGS PIGS SQUEEZE CHUTE

## MS7515 model 5y.warranty

**Installation diagram illustration what to avoid during the process.**

**Includes spare parts list with part numbers and prices**

### "LESS BREAKDOWN"

Included: (4) pcs. 5,000 lb capacity shear beam load cell with more than 20'ft of Silicone coated cable long enough that you will ever need for a chute. This could handle 10,000-20,000 lb of pressure on either side, entrance or exit. Electronic parts are environmentally sealed with 150% safe overload. (helps with shock load for bulls)

(4) swivel feet that will do 360 deg. swivel and bend so a bucking bull won't break it

(1) Stainless Steel Water tight NEMA 4X junction box that we Pre-wire to indicator and One load cell to make sure you will see how to wire the rest of them. you will need a flat head screw driver for terminal box wiring and small adjustments on pic. but not provided.

(4) spacers for the load cells and bolts and Mounting blocks you weld under frame. (8) Flat washers, (8) spring washers, (4) threaded mounting blocks, (8) bolts, (4) load cell spacers ALL IN KIT !

(1) Digital weight indicator with quick disconnect Already pre-made with 20'ft cable. MS7515 same as Locosc LP7515 Indicator with standard AA battery (3pcs.) Comes with AC adapter and (3)AA battery. New indicator model with standard 5pin Locosc quick disconnect. if you like to upgrade to a larger monitor with Locosc brand you don't need to change the cable from your base to scale head.

MS7515 indicator weighs in Lb or Kg. MS7515 has a Large number and blue backlit LCD display for easy viewing. Standard RS-232 output for printer feed, or PC connection. For animals use HOLD function built into the indicator. (most farmers don't use it because the indicator is accurate enough with regular weighing function, but it is there for your convenience. Indicator will come Pre-set but for accurate weighing you should calibrate it.

(1) manual for calibration setup and Important part example of proper installation with drawing, as we did some installations of our own we kind a know the most common mistakes you can make so we put a drawing together to help you avoid these common mistakes.

Last install these Cattle Squeeze Chute on solid surface, Not in Mud or Gravel. Install it on level concrete or some solid surface, could be planks but make sure it is solid and level. Level the foot make sure they are not wobble, if they wobble adjust them make sure they are firm on the ground before calibration.

Warranty is 5 years limited. if unit is failed do to manufacturing problem we will warranty it.
